

Audit report: „Statistics Poland Information Portal” website

Status as of: **2026-01-26**

Web browser: **Google Chrome**

Screen reader: **NVDA**

Audit result

The **Statistics Poland Information Portal** website **is partially compliant** with the annex to the Act of April 4, 2019, on the digital accessibility of websites and mobile applications of public entities.

It meets **35** success criteria of WCAG 2.1, and **14** are not met.

List of errors

- Some functionalities on the website may not work correctly.
- Some links lead to the old version of the website (temporary solution).
- Not all messages that appear are automatically read by the screen reader.
- The English version of the website may contain messages and descriptions in Polish.
- Some messages may not be fully clear to the user.
- There are areas where the focus order is incorrect or the focus does not meet contrast requirements.
- Some pages have incorrectly implemented breadcrumbs.
- After using a skip link to jump to the content, the system currently has an issue with scrolling back to the very top of the page (using the keyboard).
- Not all elements are displayed correctly in the mobile version.
- Some tooltips may not be fully digitally accessible.
- The website contains non-text elements that do not have an alternative text or have an incorrect one.
- After increasing text size to 200%, some elements may overlap or be cut off.

- Some pages have an incorrect title.
- The website contains files that are not fully digitally accessible.
- Some links do not have clear, descriptive text.

Methods used

Manual and automatic validation methods were used.

The following tools were used for automatic validation:

- [NVDA screen reader](#),
- [Markup Validation Service](#) or [Google Chrome plugin](#),
- [WAVE validator](#) or [Google Chrome plugin](#),
- [Colour Contrast Analyser \(CCA\)](#),
- [PDF Accessibility Checker \(PAC\)](#).
